\*Each session is 4 weeks long and meets weekly (Except Thanksgiving week, Winter break and Spring Break holidays).

\*You can make-up your missed day by joining another age-appropriate class on another day (except Craft Club), otherwise, credit for missed days is not given. \*Free trial classes are available for all classes (except Craft Club). \*We work with the Step Up For Students program for homeschoolers for use in any of our classes. \*Tuition is billed on the 1st and is due by the 15th of the month for each **upcoming** 4 week session. \*Supply fee for each session is included in the cost of the class. \* You are welcome to pay in check or cash and receive a \$5 discount. \*Multiple sessions can be paid for in advance.

**Art Lab 1: PreK-4 and KG; Art Lab 2: 6-8 years old; Art Lab 3: 8-10 years old; Art Lab 4: 10+ years old; Homeschool Art Lab 5+:**

Our most popular class with kids! Students are free to use studio media and materials independently on their own unique creations. The instructor's role is to teach correct use and care of materials, introduce new materials and techniques, and most importantly, support each student's process of self-guided art investigation and inquiry. Focus is on process, exploration and experimentation, not product.

**Art Masters- 6-12 yrs:** Students learn how to use a wide variety of media through a teacher-led format that integrates learning about historical and present day artists who use that media. Media that we cover are: Drawing Media, Painting Media, Collage, Clay, Paper Mache, Sewing , Yarn Art, 3-D sculpting and more.

**Craft Club- KG-12 yrs:** This class focuses on crafts that relate to the season or holiday through direct instruction using a variety of materials including painting, collage, sewing, gluing, sculpting, printmaking and more. Focus is more on product than our other class options.

**Crochet Club- 9 yrs & up:** The instructor will start students out with basic crochet, then adjust to each child's learning speed with a variety of projects throughout the year. Beginners are welcome, but this class is best for children who have good hand-eye coordination.

**Draw and Paint Club 7 yrs & up-** For students who are serious about learning and improving their drawing and painting skills, we offer two levels of classes. Level 1 is for elementary aged children who are learning and then practicing the fundamentals of observational drawing and painting techniques. Level 2 is for children in middle school and up who are ready for more challenging subject matter and refining their understanding and use of value, shading, perspective and more. Both classes allow students to work on their own self-paced pieces. (No cartoon or anime is taught)

**Imagination Club- 7 yrs & up:** Calling all master builders! If your child loves to build things, they will love this class. Students create exciting 3D works of art, based on fun and stimulating monthly themes so kids use their critical thinking, invention and making skills through repurposed materials to create one-of-a-kind models and structures. Sample themes for the year: Create a Creature, Treehouse Masters, Food Truck Nation, Dream House Challenge, Out Of This World, Myths and Magic, Cozy Campers, My Town, Islands of Adventure.

**Mixed Media Makers- 6 yrs and up:** Mixed Media Makers is a year long, teacher guided, playful exploration of the wide and wonderful world of art media. Perfect for the child who loves exploring and playing with lots of different materials, variety and making a beautiful mess!

**Stitch Club-7 yrs & up:** In this class, students will learn about textile arts such as hand and machine sewing, weaving, embroidery, yarn art, needle punch, pom-poms, cross stitch and introduce crochet and/or knitting at the end of the year. Two classes are offered, one introduction and one advanced. Please talk to the instructor to find out which would be the best placement for your child.

**Wild Art- 6-12 yrs:** This class is for the nature loving child who wants to learn more about our natural world through art. Instructors provide background information about different animals, and then students use a wide variety of materials and media to represent the animal creatively.
